## **LaserBlades with High-Resolution Graphics**

**Price:** [Call for Pricing](#)

LaserBlades provide the benefits of blade technology -- rack density, remote management and serviceability -- combined with high-resolution 3D graphics adapters such as the NVIDIA GeForce 8800 GTX.

Tuned for 3D graphics applications, LaserBlades are perfect for graphic simulators, CAD and training. Built with desktop Core 2 Duo / Quad processors, LaserBlades also support RAID1 failover for mission-critical applications. LaserBlades support dual- and quad-head displays as well.
